A hot humid air mass led to a few strong to severe storms that moved over portions of central Mississippi during the late afternoon and early evening hours of August fourth, fifth and early in the evening of the sixth. These storms produced thunderstorm wind damage, as well as minor damage from outflow winds. A lightning strike was reported at Dogwood Festival in Flowood, MS on the fifth. No significant injuries were reported. An indirect fatality occurred in Webster County around 545 am on the fifth when a car collided with a fallen tree on the Natchez Trace Parkway just north of Highway 82.

Trees were blown down near McLaurin and northwest of Maxie.

A hot and humid air mass led to the development of a few strong to severe thunderstorms over portions of central Mississippi during the afternoon and early evening hours of August twentieth through twenty fourth. These storms produced wind damage primarily in the form of blown down trees and power lines. A few instances of structural damage also occurred.
